Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the prior art made of record, claims 1-28 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a method and system for forming images for display in a vehicle comprising an array of detector elements, each detector element receiving energy from a portion of a scene and converting the received energy into information representative of the received energy, the detector sending the information associated with at least some of the detector element to the display unit, and a computer coupled to the detector, the computer receiving heading information, selecting the detector elements that should be used to form an image based on the heading information, and instructing the detector which detector elements should have their associated information sent to the display unit.

It is noted that the closest prior art of record (Stam et al. US 6,297,852) teaches a similar method and system for forming images for display in a vehicle, however, Stam

Art Unit: 2613

fails to particularly teach or suggest "a detector sending information associated with at least some of the detector elements to a display unit, and a computer coupled to the detector, the computer receiving heading information, selecting the detector element that should be used to form an image based on the heading information, and instructing the detector which detector elements should have their associated sent to the display unit." as specified in the claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hancock et al. (US Patent no. 5642106) teaches visual incremental turn detector.

Hall (US Patent no. 5394520) teaches imaging apparatus for providing a composite digital representation of a scene within a field of regard.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
